Parts of AutoCAD are licensed under the Open Font Library License (OFL), allowing programs which use them to do so free of charge. The license allows distribution, sale, and modification of programs which include the licensed fonts, and source code must include attribution to the Open Font Library and the original author. The first few releases of AutoCAD allowed an unlimited number of users to be connected to a single CAD session. On release of AutoCAD 2009, the maximum was limited to 512 users. AutoCAD 2007 and earlier is affected by a bug which causes the length of objects to be doubled if they are brought into view. Supported platforms Autodesk first announced support for 64-bit computers in the Autodesk Technical Library (ATL) in 2001, and previewed full 64-bit support in the first official beta of AutoCAD 2004 in 2003. AutoCAD 2004 was released for Windows, macOS, and Linux. It was followed by AutoCAD 2005 for Windows and 2005 Mac, AutoCAD 2006 for Windows and Linux, AutoCAD 2007 for Windows and 2008 for Mac, AutoCAD 2008 for Windows and AutoCAD LT for Mac. With the release of AutoCAD 2009, Autodesk announced that the 32-bit editions of AutoCAD and AutoCAD LT would be discontinued. The 32-bit versions are no longer supported by the Autodesk developer community and no longer receive any patches or updates. Only the 64-bit version is currently supported. AutoCAD 2010 was released for Windows XP and later, for Mac OS X 10.4 and later, and for Unix-based platforms with a minimum of 32-bit GCC. AutoCAD LT was discontinued as a separate product, but it continues to be available through the AutoCAD suite at no cost. AutoCAD 2011 was released for Windows XP and later, for Windows 7 and later, for Mac OS X 10.6 and later, for Linux, and for Unix-based platforms with a minimum of 32-bit GCC. AutoCAD LT was discontinued as a separate product and continues to be available through the AutoCAD suite at no cost. AutoCAD 2012 was released for Windows 7 and later, for Mac OS X 10.8 and later, for Linux, and for Unix-based platforms with a minimum of 32-bit GCC.
