Before 1982, drafting had been limited to the use of paper, pens, and mechanical drafting tools. AutoCAD was the first desktop application to allow for the creation and manipulation of 2D and 3D geometric models. AutoCAD became a commercial success because of its ease of use and higher quality than other drafting tools at a lower price than mechanical tools. The high cost of AutoCAD, however, became a limiting factor in the use of the application. In 2010, the acquisition of AutoCAD by the German multinational software company Autodesk and the discontinuation of Microsoft's Office Business Desktop suite of products led to significant changes in the AutoCAD product and user base. The product is currently bundled as a part of the \$500/year Autodesk® AutoCAD LT® software. Features As of 2018, AutoCAD and AutoCAD LT are offered in a subscription plan through a yearly AutoCAD product license. AutoCAD is available as a free, ad-supported trial version, a paid, feature-limited consumer version, or a paid, full-featured commercial version. The table below compares the features available in the three AutoCAD versions: System requirements AutoCAD 2016 and later versions can be installed and run on Microsoft Windows 10. AutoCAD 2017 and AutoCAD LT 2017 require a processor with AVX (Advanced Vector Extensions) instruction support. AutoCAD 2018 and later versions require a processor with AVX2 instruction support. AutoCAD LT 2018 and later require a processor with MMX instructions support. Versions Note: AutoCAD 2017, AutoCAD LT 2017, and AutoCAD 2018 require a supported processor. AutoCAD AutoCAD LT Internet/Mobile app Internet/Mobile App is a web-based version of AutoCAD (AutoCAD LT) that allows the creation, editing, and viewing of 2D and 3D drawings. Two black candidates endorsed by the Obama administration on Tuesday — gubernatorial candidate Stacey Abrams in Georgia and mayor candidate Chokwe Lumumba in Jackson, Mississippi — were upset by Republican opponents, in the first election tests of black support for the new president. Voters in both states turned out in droves to vote for Abrams, the former Georgia state House minority leader, on Tuesday. She was endorsed by President Obama and several other Democrats, including Hillary Clinton, Stacey Dash, Bill Richardson and the Rev. Al Sharpton. But Abrams lost by a mere 44,000 votes out of more than three million cast. GOP opponent Brian Kemp, Georgia's secretary of state and a conservative conservative in office, beat her by 9 percent of the vote. In Mississippi, Jackson mayor Chokwe Antar Lumumba was running for the Democratic nomination for mayor against Mike Brown, who was backed by the state's two top Democrats, Gov. Phil Bryant and Sen. Cindy Hyde-Smith. Trump has come under fire by critics for the way he has spoken about and rallied against minorities. He is backed by more than 80 percent of the black community.
