Fifa 22 Serial Key introduces “HyperMotion Technology,” which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. A principle objective was to challenge developers and the leading players in the world to push the boundaries of the human game. This requires an advanced simulation platform that enables us to create and share many alternative scenarios in our latest release. These scenarios allow to test critical decisions in different contexts by providing multiple playable events. - Rich and deep gameplay simulation & depth - New animation method: In-game animation module - New physics system: Movement-based & Movement-driven BVP - New sub-pixel hit-detection algorithm - Recreates the atmosphere of the real-life football match - Switch between different match contexts: Short and long distance movements, small and big movements, pace, positioning and play style - “Intelligent AI” engine for all actions and players - New global motion - New animation events - New graphics engine: Procedural low-poly object models - New weather system - Refined camera for close-ups, animations, cinematic shots and match realism - Updates and improvements to the graphical and visual fidelity - Added Player Stance Mechanism - Added Match Decisions - Added Player Traits - Enhanced Player Physics & Ball Physics - Editor: An integrated in-game editing mode was added to the game creating an even more comprehensive editing environment. This enables players to edit specific items in-game and is therefore accessible from the menu system. - Multiplayer: A simulator was implemented to measure and test various game scenarios. The simulation is driven by a game-specific simulation engine. As new simulation scenarios are created, players are given a real world input. The various combinations of conditions are measured and made available to players for the purpose of scenario evaluation. The player will therefore know what he/she can do and can evaluate the outcome of the simulation. After simulating a single scenario, users can simulate multiple scenarios and therefore compare the outcomes and make decisions. A pre-defined evaluation of scenarios is made available to the players. This allows players to determine the most appropriate course of action.

## **Features Key:**

- Real-life player likeness and emotion
- Three-dimensional stadiums that feel connected to the pitch
- Real Champions League atmosphere for Be A Pro™ features
- Defense AI based on Motion Casting technology
- Five Ways to Win

- 
- Tactical AI with Tactical Mastery system
  - Accelerated in-game 3D performance with High-Tech Ball and Player Physiques
  - Multiple camera angles
  - Multiscreen Control,\* with improved PlayStation TV, Xperia™ Play and PlayStation®Mobile compatibility
  - New Soccer Matchday Moments, which add authentic celebrations, celebrations, player talk and more. First team and third team kits are available to choose from.
  - Manage your team from the dugout and press the action from the touchline
  - First club in the world to include higher fidelity stadium audio
  - First club in the world to include tablet display imagery
  - Dynamic Physique - Pro like attributes that respond to gameplay on the pitch for better strength, stamina and acceleration.
  - Dynamic Personality - Pro like attributes that respond to gameplay for better vision, reactions, dribbling and more.
