How to fix 'Invalid date' when trying to add to a datetime object using moment js I'm trying to add a certain amount of days to a given date time object, and it keeps throwing up 'Invalid Date' but the dates are fine. I'm using Moment JS to create the date and do the math. The weird thing is, when I just run the script, it works. But as soon as I attempt to add days to the date, it crashes. Any ideas? `var startDate = new Date("Sun Dec 30 00:00:00 GMT-05:00 2016"); var dt = new Date(startDate.toDate()); var endDate = dt + 1000;` A: You are not converting the date-time object correctly. Use `var startDate = moment(new Date("Sun Dec 30 00:00:00 GMT-05:00 2016")); var dt = moment(startDate); var endDate = dt + 1000;` Although you don't need the second line. A working example is here, by momentjs docs.
