Like xenobiotic-metabolizing cytochromes P450 of the low-affinity monooxygenase (LMO) group, major human lipoxigenases (LOXs) have little or no affinity for endogenous substrates and for xenobiotics but are essential for proper signal transduction. These LOXs do not metabolize xenobiotics either. Interestingly, the breast cancer progesterone receptor mediates a teratogenic effect, resulting in cleft palate or vesicoureteric reflux, while the estrogen receptor does not. The former effect appears to be due to a LOX-dependent signaling pathway to the nucleus whereas the latter effect occurs in a LOX-independent manner. It is proposed that the simultaneous high-affinity metabolism of the two different drugs by at least one xenobiotic-metabolizing enzyme is critical to their differential teratogenicity, which may represent a novel strategy to reduce their teratogenicity.An ion trap mobility spectrometer has been used to analyze the chemical structures of pharmaceutical drugs and other compounds. An ion trap consists of two electrodes inside a housing. The housing is maintained at a low pressure to keep particles of analyte inside during ionization and mass spectrometry. The two electrodes serve as the anode and the cathode of a storage ring. The analyte is ionized at the electrodes and then transported by applying radio frequency (RF) voltages to the electrodes. Conventional apparatus used to analyze ionized analytes may include an interface located between an ionization chamber and a housing, which defines a diameter or width

A happy ending to our story is that on March 6, 2012, 18,700 Mission Clean and Safe food and hygiene kits were delivered to a shelter in San Antonio. These kits were filled with food for a one-year period, cleaning supplies, and basic hygienic supplies. Mission Clean and Safe has chapters across the U.S. We are still accepting donations for our San Antonio Chapter and supporters across the country are still able to support a local chapter. If you'd like to learn more about supporting Mission Clean and Safe or if you want to become a volunteer, email [email protected] or visit the Mission Clean and Safe website:Q: Is it possible to rewrite the data in a RDD to Java RDD? I have a RDD> called "binaryTree". Is there a way I can convert binaryTree to Java RDD>? I cannot use Java 8 and therefore the only way I can achieve this is by Java 7 and the new Function2 API. A: It's possible to map a DataFrame to a JavaRDD using the DataFrameReader class. The easy way to try this is by using the tojavaR
