The software and telephone chip are the same as in MEDIONmobile UMTS Webstick S, but since it has a special interface for Windows it is not possible to download the software on Windows systems. The medionmobile web stick s4012 software should be installed on a USB-port on your computer. /USB hardwareinfo/MedionSUBS.txtQ:
Trabalhar com 2 tabelas

simultaneamente Estou a usar um novo framework web2py, e ele não aceita tabelas associativas, por exemplo, preciso colocar outra tabela que seria o "tamanho" para o cliente ter uma referência para cada cliente, porém porém deixar as tabelas associativas e essa tabela "tamanho" ser associativa. O que eu fiz foi a criação de um novo arquivo e isso foi feito corretamente. O que deveria fazer, utilizar o framework web2py ou então eu aplico o código em si mesmo utilizando os comandos

para criação de linhas e os comandos para relacionar os clientes dessa tabela com as tabelas associativas? A: Olá, basicamente vc pode resolver o seu problema com 2 tabelas que são feitas de acordo com uma restrição, e depois adicionando as relações. Mudando sua versão para a 3.11:

```
from gluon.contrib.modelopts import has_table from gluon.contrib import app, db class tamanho(db.Model): content_id = db.Column(db.Integer, db.ForeignKey('content.id'))
```

```
        content_guid =
        db.Column(db.String,
unique=True) content_filepath =
        db.Column(db.String(1024))
        content_title =
        db.Column(db.String(2048))
        content_resource_id =
        db.Column(db.
```
