-----Unison gas furnace maintenance in Philadelphia. Unison Services is your furnace and air conditioning repair and maintenance solution for gas furnaces. Contact our team of experienced technicians for regular service and maintenance at any time. We install, service, and repair a variety of heating and air conditioning systems including gas furnaces, heat pumps and ductless heating systems. Your home comfort is our priority. One of the reasons that they are so popular is that they're typically easy to maintain, and just as important, are inexpensive to operate. How a Gas Furnace Works Efficient gas heating equipment is capable of converting 90 to 95 percent of gas into energy to heat your home. In the winter, gas furnaces and heat pumps work to supplement your existing heating system and work to offset your air conditioner. During the summer, they work as the primary heating source in your home. The furnace converts the gas to heat your home. The difference between gas heating and gas powered water heating is found in the water. When gas is burned, the gas is converted into heat and then dispersed to warm water, resulting in an even, consistent temperature. When gas is used to heat water, the gas is converted to steam and the water in the kettle is heated. Because the water is heated through the sole action of steam rising in the kettle, steam water heating is highly inefficient. Gas furnace systems are available in many different designs. The two most common designs are the manufactured single-point ductless furnace and the condensing furnace (also known as a return air ductless furnace). A single-point ductless furnace is installed just outside the existing furnace. Because no
