\* See Resources at the end of this chapter for more Photoshop resources. \* The Photoshop tutorials at [www.photoshop.com](http://www.photoshop.com) are, frankly, the best. Using Photoshop Photoshop is a creative tool — which means it's easier to get something done with Photoshop than it is to do it by hand. However, it's much more than a creative tool; it's a piece of software that enables you to create, modify, and process your images. The following sections show you how to do just that. Creating a new image One of Photoshop's most powerful tools is the ability to easily create a new image, merge two or more images, or combine them with the Photoshop adjustment layers. The following sections walk you through this process. Photoshop Creative Suite Photoshop Creative Suite is Photoshop with layers, filters, and layers that enable you to work on multiple photos at once. Although the following sections show you how to work with just one photo at a time, the advantage of using Photoshop's multilayer capabilities is that you can combine layers from multiple images in different orders. Photoshop CS4 With Photoshop CS4, you can import multiple images with a different number of layers and still combine them into a single file, but you cannot import multiple files and create a new file, as you can with Photoshop CS3. Regardless of your version of

Photoshop, you can keep your original image open while working with a new file or imported image. Importing an image and creating a new image A new image opens up when you choose File⇒New and press Enter or click the New icon (the icon looks like a blank sheet of paper). For many people, this is the first time they are creating a new image in Photoshop. When you're ready to create a new file, follow these steps: 1. **Open an image from your computer** You can use any one of the following methods to open an image in Photoshop: \* Double-click an image in your image-editing program \* Choose Image⇒Open or press Ctrl+O \* Choose File⇒Open or press Alt+O \* Choose File⇒Import or press Ctrl+I 2. **In the New dialog box, choose Image Type (shown in **Figure 4-1**), and select your choice from**

Renoir's best-known painting is this seascape, *La baignade*. *La femme au pendu* is the same artist's most famous subject, and the painting that sold for \$150.3 million, almost 8 times the amount it originally sold for. Image Credit: Christie's Images/The Bridgeman Art Library via Getty Images This 1958 sculpture by Marino Mazzocchi and Ida Mazzocchi, a married couple in Italy, is the most successful of its type. Image Credit: The Bridgeman Art Library via Getty Images In 1907, the artist Matisse bought his first painting by a man whom he regarded as an artist of genius. It was Muybridge's famous photograph of galloping horses, *The Horse in Motion*. The painting remained in the family for three generations before passing on to Matisse's son Jean, who sold it for a record \$120 million to the Tate Gallery in London in the 1970s. Image Credit: The Bridgeman Art Library via Getty Images Ernst Ludwig Kirchner (1880-1938) was a German painter known for his fastidious style and the extreme violence of his subject matter. *The Wanderer* above, is one of his most famous works. Image Credit: The Bridgeman Art Library via Getty Images "Art has never gone out of fashion," said Picasso. "On the contrary, it has never gone out of fashion." So wrote the French critic and playwright Roger Blin, in a book he wrote in 1952. I.M. Pei is hailed today as the most important architect of the 20th century, following his construction of the Louvre pyramid, the glass pyramid in the New York World's Fair of 1964, and the glass and concrete glassy building that opened in Beijing in 2008. Pei was born in China in 1919. While you're here, why not take a look at the other artistic icons, taking a bite out of it? Prayer Request Blessings, I would like you to pray for a person whom I am in need of. My heart has been broken, and I am seeking and desiring for God to heal that wound through prayer, and the power of the Holy Spirit. Please pray specifically for: My friend, whom I love and cherish dearly, has been in a very difficult situation with her father/husband and I am praying for his deliverance.

The present invention relates to a method of detecting magnetic signal leakage or related signal bias distortion in a magnetoresistive magnetic head, the method comprising steps of: a) generating a test waveform at a predetermined frequency; b) applying the test waveform to the magnetoresistive magnetic head; and c) receiving a signal response reflected by the magnetic head from the input of the magnetoresistive magnetic head, and d) determining a leak signal based on the input waveform, the output waveform and the signal response. The method of the present invention is preferably implemented in a magnetic data recording/reproducing apparatus which uses the magnetoresistive magnetic head to read and/or write data by detecting the magnetic signal. In a known head assembly used in a magnetic data recording/reproducing apparatus (such as a fixed head assembly and a rotary head assembly), as shown in FIGS. 1 and 2, a pair of ferrite cores 1a and 1b are interposed between a magnetizing yoke 2 and a frame 3. A magnetic recording medium 4 is disposed outside the frame 3, opposing the ferrite cores 1a and 1b. A magnetoresistive magnetic head 5 (hereinafter termed a MR head) is provided, which is positioned facing the ferrite cores 1a and 1b. A pair of coil yokes 6a and 6b are provided for driving the MR head 5. One end of the coil yoke 6a is coupled to a ground terminal Vg through which a ground current or bias current is supplied to the
